

CHEMET WETS & FLOWS P.LTD.

Mfg. of :
Animal/Public Health, Hospital Hygiene,
House Hold & Seed Treatment Chemicals

A Generous Message to All Our Stakeholders

As a responsible manufacturing unit, we contribute to India's economy by creating jobs and paying taxes. We work in compliance with the law and maintain fair and transparent dealings with government authorities. Our growth is linked to the interests of our customers, suppliers, service providers, bankers, employees, and society.

We request our stakeholders to understand our importance and support our efforts. Let us work together for a sustainable future. We seek guidance and learning opportunities from the authorities so that we can get solutions and opportunities not disagreement or rejection. In this way, India can become a global leader in manufacturing. Together, let's build a prosperous, strong, and sustainable future for India.

In India, MSMEs/micro-units are the main source of employment. MSME units provide more jobs than medium and large industries. Units like ours have to go through many rules and regulations, which is a major challenge let's make this simpler.

We acknowledge your presence in our existence.

TEAM CHEMET
